### Performance By...

G84B99 performs well across all soils. A semi-determinate ear type means that growers should push above their normal planting populations. Best performance is between 31,000-36,000 plants/A. G84B99 has excellent performance in any crop rotation.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
