

VT Double Pro® RIB Complete® Corn

PRODUCT INFORMATION

LG26C61 produces top notch yields of high test weight grain with excellent grain quality. Very well adapted across the far northern regions with good standing medium statured plants.

- Reliable yield performance for the very early season corn growing regions.
- Excellent grain quality and high test weight with tolerance to most common leaf diseases.
- Early flowering for its maturity, early black layer formation, has very fast drydown.
- Well adapted to all soils and is recommended for continuous corn.

PLANT CHARACTERISTICS

MANAGEMENT TIPS

LG26C61 is the earliest offering in the LG Seeds lineup. This product features high population tolerance, and performs well on all soil types. Semi-flex ears handle varying populations. Can be effectively planted in corn-on-corn environments.

MANAGEMENT PRACTICES

	1	2	3	4	5	6	7	8	9
Low Populations	█	█	█	█	█	█	█	█	█
Medium Populations	█	█	█	█	█	█	█	█	█
High Populations	█	█	█	█	█	█	█	█	█
Marginal Soil	█	█	█	█	█	█	█	█	█
Productive Soil	█	█	█	█	█	█	█	█	█
Continuous Corn	█	█	█	█	█	█	█	█	█
Adapt To No Till	█	█	█	█	█	█	█	█	█

9 = Excellent 1 = Poor N/A = Not Available

GDU's are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
