

VT Double Pro® RIB Complete® Corn

PRODUCT INFORMATION

LG31C81 is a stable early maturity option when placed on productive soil types under high management practices. Top-end yield potential, fast drydown and very good test weight.

- Powerful performance in the Red River Valley and on productive soil types.
- Semi-flex ears have good drydown and produce good quality grain.
- Very good disease tolerances with good standability.
- Early flowering and fast drydown for this maturity.

MANAGEMENT TIPS

Excellent yield performance on productive corn soil types. Can handle high populations well and is recommended for use in continuous corn rotations.

PLANT CHARACTERISTICS

	1	2	3	4	5	6	7	8	9
Early Vigor	2	3	4	5	6	7	8		
Stalk Strength	1	2	3	4	5	6	7		
Root Strength	2	3	4	5	6	7	8		
Greensnap	2	3	4	5	6	7	8		
Drydown	2	3	4	5	6	7	8		
Staygreen	1	2	3	4	5	6	7		
Drought Tolerance	1	2	3	4	5	6	7		
Test Weight	1	2	3	4	5	6	7		
Harvest Appearance	1	2	3	4	5	6	7		
Hard Endosperm

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
