

Roundup Ready® Corn
2

PRODUCT INFORMATION

LG32C29 consistently performs well throughout the northern region. A great companion hybrid for those looking for a shorter plant stature with high yields and good results under irrigation.

- Top end performance across the northern Corn Belt.
- Excellent stalks and very good roots; produces good test weight grain from semi-flex ears of average girth.
- Superior disease ratings for NCLB, Eye Spot, Common Rust, leaf Anthracnose and Goss's Wilt.
- Excellent late season intactness and greensnap tolerance.

MANAGEMENT TIPS

Solid performance when planted at med-high to higher populations. Good performance on irrigated sands and excellent performance on silts, loams and clays. Recommended for planting in continuous corn situations. Fungicides should only be applied following a field scouting program.

GDU's are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
