

VT Double Pro® RIB Complete® Corn

PRODUCT INFORMATION

LG36C62 excels across varied environments with great emergence and early vigor. High yield potential is furnished by good standing plants with great fall appearance.

- Excellent top-end yield potential from medium-tall plants that stand well into the fall.
- Very girthy ears produce quality grain of good test weight.
- Generally very good to excellent disease characterizations; average response against Goss's Wilt.
- Very attractive appearance throughout the growing season with good staygreen and fall intactness.

MANAGEMENT TIPS

Excellent yield performance across multiple environments, planted early or late in the spring. Excellent performance on medium textured soils and can handle irrigated sands well. Plant stature would indicate good potential as a dual purpose product. Can be effectively used in corn-after-corn situations.

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
