

VT Double Pro® RIB Complete® Corn

Roundup Ready® Corn 2

PRODUCT INFORMATION

LG5369 has high yield potential with great agronomics and excellent intactness. Use as a full season product for planting on productive and marginal soils.

- High yield potential and great harvest appearance, early flowering in its adapted zone with good east-west movement
- Excellent root strength, very good stalk strength, high test weight with good husk cover.
- Generally a very good disease profile with average Goss's Wilt tolerance.
- Recommended for continuous corn situations.

MANAGEMENT TIPS

Suitable for planting on productive and marginal soils as a full season product. Early flowering in its adapted zone with good east-to-west movement. Can be used in the High Plains dryland environments. Recommended for continuous corn situations. Handles moderate to higher populations well.

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
