

LGS00663RX

0.06 RM

PRODUCT INFORMATION

LGS00663RX performs well across North Dakota, the Red River Valley regions and through northern Minnesota. Provides a great agronomic package.

- Good candidate for northern Iron Deficiency Chlorosis acres.
- Thin-line, medium height plants have excellent emergence and very good standability.
- Very good White Mold scores and resistance to Phytophthora Root Rot.
- Soybean Cyst Nematode protection.

MANAGEMENT TIPS

Adaptable to varying soil types. Holds its height in stress environments. Excellent performance under reduced tillage situations and in all row spacings.

PLANT CHARACTERISTICS

	1	2	3	4	5	6	7	8	9

Sclerotinia White Mold	█	█	█	█	█	█	█	█	█
Sudden Death	█	█	█	█	█	█	█	█	█
Frogeye Leaf Spot	█	█	█	█	█	█	█	█	█
Charcoal Rot	█	█	█	█	█	█	█	█	█
Stem Canker	█	█	█	█	█	█	█	█	█

9 = Excellent 1 = Poor N/A = Not Available

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
