LGS00899RX

0.08 RM

ROUNDUP READY 2 XTEND SOYBEANS

New

PRODUCT INFORMATION

LGS00899RX has good overall performance and is very strong through the Red River Valley and on severe Iron Deficiency Chlorosis (IDC) soils as well as moving west in North Dakota.

- A key line in this maturity with very strong yield potential.
- Medium tall, thin-line plants have the height to handle the northern stress environments.
- Very good IDC scores highlight superior BSR, PRR, SCN and White Mold characterizations.
- Provides Rps1k gene and good field tolerance for added PRR protection.

PLANT CHARACTERISTICS

MANAGEMENT TIPS

Adaptable to varying soil types. Holds its height in stress environments. Excellent performance under reduced tillage situations and in all row spacings.

MANAGEMENT PRACTICES

	1	2	3	4	5	6	7	8	9
Poorly Drained Soils	■	■	■	■	■	■	■	■	■
Marginal Soils	■	■	■	■	■	■	■	■	■
Productive Soils	■	■	■	■	■	■	■	■	■
Adapt to No-Till	■	■	■	■	■	■	■	■	■
Early Vigor	■	■	■	■	■	■	■	■	■

DISEASE RATINGS

Cyst Nematode Resistance R3, MR14
Phytophthora Race Resistance Rps1k

GDU's are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
